13th February 2026

Dear Parents/Guardians,

We are strongly considering the introduction of 1:1 Student Laptop Devices for our incoming 5th year students. 1:1 means that each student has a dedicated educational device for use both in school, and at home.

Factors that support this consideration include significant changes to the Senior Cycle curriculum, the proposed smartphone ban, and the growing requirement for digital skills into 3rd level and beyond.

We will take a fully blended approach to teaching and learning, and the devices and technology will not replace traditional classroom methods, instead they will serve as a very important additional tool for our students.

We understand you will have a lot of questions, so I ask you to join us on Thursday February 26th at 7pm where we will present relevant information, including:

- Why this introduction is being considered
- Details of the proposed Laptop Device and why that model
- How devices will be set up and managed safely and securely
- What supports will be in place for students and for you, as parents/guardians
- What the costs will be and what payment options will be available
- What the next steps will be

Your questions will be a hugely important part of the night, so we will dedicate as much time as is needed to answer those.

Kind regards,

Kevin Langton
(Principal)
